

Superior Court of California
County of Santa Cruz

Dear Community Partners:

Our new case management system, Odyssey, is a party based system. In the hopes of not duplicating party entries we will be asking every customer that files documents after October 12 their birth date so that we have an identifier beyond name and address to identify parties that are already in our system. We understand that some parties may not want to share this information or that someone such as an attorney or court runner may not have this information. It will not be required; only helpful to our new system. We wanted the court community to know that we will be making this inquiry.
